Did you know this?

* Epstein told multiple people he wanted to "seed" the human race with his genome.
* Bill Gates' science chief (who has a controlling voice within Moderna) was with Epstein and him.
* mRNA shot's lipid nanoparticles and sperm heads are almost identical in their structure (that's how they can penetrate cells).
* Moderna patented and used a reverse complementary version of the sequence CTCCTCGGCGGGCACGTAG in its deathj*b.
* This sequence matches something found in two places: Mycobacterium Smegmatis and human genital discharge.
* The patent was registered BEFORE the COVID-19 event took place. See the patent here: JP 2017197545-A.
* The COVID-19 virus itself contained the same sequence, proving it was engineered beyond any reasonable doubt.
* We recently discovered cancer patients with cells that didn't just reverse transcribe the RNA (thanks to LINE-1 deregulators also in the vaccine), but also integrated into the genome.

[STOP READING HERE IF YOU WANT TO SLEEP TONIGHT]

Most disturbingly, putting these pieces together:

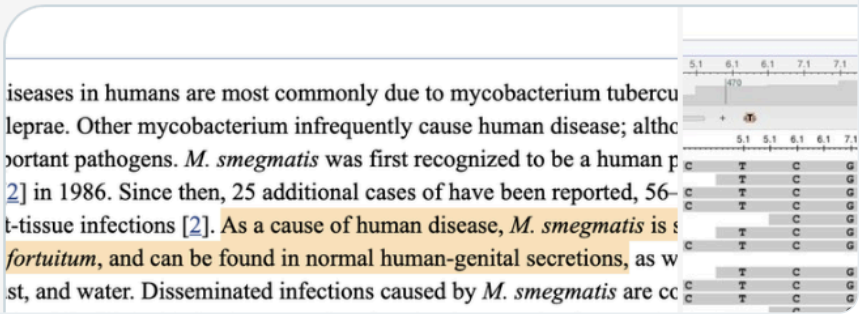
* Epstein who had access to the vaccine makers, said he wanted to see his DNA into the human race.
* The death jabs contained a sequence that can potentially come from human genital discharge.
* The mRNA vaccines' lipid nanoparticles act exactly like sperm heads do.
* We've found evidence of the RNA sequence integrating into the human DNA in cancer patients.

What exactly was in that vaccine? Remember these freaks are still running the world even if they retired one of themselves. You have no idea how degenerate they are.

If you've taken the moderna vaccine, you probably want the Epstein files to be released in their entirety.

There is a human pathogen named Mycobacterium smegmatis.

It has a series of small _most likely not meaningf
from its ribosomal RNA that show as 100% iden
insertion in the SCoV2 genome. (+Human rRNA,



iseases in humans are most commonly due to mycobacterium tubercu
leprae. Other mycobacterium infrequently cause human disease; altho
portant pathogens. *M. smegmatis* was first recognized to be a human p
2] in 1986. Since then, 25 additional cases of have been reported, 56-
t-tissue infections [2]. As a cause of human disease, *M. smegmatis* is s
fortuitum, and can be found in normal human-genital secretions, as w
st, and water. Disseminated infections caused by *M. smegmatis* are co
