War Intro Thread:

For the first time, Iran was struck by Israel directly and overtly.

It happened in a third territory: war-torn Syria, but in Iranian territory, an embassy annex.

Official military attaches were killed, very senior officers in charge of logistical operations./🧵

A lot can happen from this point, and while it's seemingly impossible to predict what does and what will follow, we can at least eliminate the possibilities that won't happen.
This will be done in parts.
First part is the easiest: the what and who.
This thread will answer these.

On the 1st of April, 6 F-35 jets launched a number of long-ranged cruise missiles, using multiple airspaces both international and regional (Jordanian) at Syria. These illegal attacks are nothing new but the target was in Damascus, an up-market residential area:
The embassy zone.

Using SIGINT or HUMINT (less likely), the Israelis determined that the annex was housing the former Quds commander turned diplomat, Mohammad Reza Zahedi. This is the most senior officer murdered by the Anglo-zionist empire since Solemani.

In short, this was a terror attack.

Alongside Brigadier General General Zahedi were 6 other Iranian military officials. A number of Syrian guards were also murdered in the process.

Needless to say, many of these men answered directly to Khamanei and he attended their funeral. Satanyahu threw the gauntel at Iran.

The embassy was damaged in the process of this terror attack but no other diplomatic staff were killed. The most important detail here is the Israelis attacked Iran, in Syria albeit, but the mission was Iranian territory in legal terms & important Iranian personnel were murdered.

With the what and who determined, we will take a detour in the next thread to discuss the intro to the why: Why did the satanic unredeemable terrorist entity known as "Israel" do this?

To do that we need to take a detour into game theory.
Coming up shortly. See you soon. /End

Next part:

Beyond the amateur war analysis: Game theory in the context of Israel's attack on Iran.

Now that we have determined what Israel did and who it killed, the next most pertinent question is why and "why now"?
The answers lie in a little discussed field.
/🧵
