Reasoning LLM = Free brain storming partner, amazing archivist and research assistance.

The moment you allow it to write for you without imposing a structure on its time you lose the ability to write, surrendering that ability to it through the transactive memory between you./🧵

This is nothing new.
This is a process discussed by Jacques Ellul.
This is a phenomenon William Morris tried to stop and failed.

There is a price to efficiency that you don't notice until it's too late. The regularisation of everything is hell itself!
You are valuable, remember,

your time should be spent not trying to become an efficient machine but to live as a source of beauty and knowledge.

You are the source, much like the sun gives us its light, you must shine the light within you onto others.

AI is just a tool, so are all industries.

People will take time to read what you write, so respect them as human beings and take time and pleasure in what you write and how you write it.

Get a paper and pen, or a eInk/ePaper and sketch out your thoughts, plan what you want to write.
Use AI to test the ideas & research.

With all that said, as long as your oomfies know something is AI generated, it's more than okay to share it. In fact, writing at an industrial scale is perfectly fine as long as you inform your oomfies that it's generated.
Then they won't try and imagine you behind the text.
/End
