If you want to unshackle your brain from the western system of indoctrination, here are some things you can do:

* Learn high order math to help you deserialise your thoughts.

* Learn multiple languages, become fluent in and think in one other than your own, earlier the better.

🧵

* Do not ever partake in evil/sinful actions and if you do, beg for forgiveness and don't yourself off easily. It is the easiest way to desensitise yourself to the others around you. This isn't just about being nice, it's being able to see the full picture.

* Avoid callous people so their callousness doesn't grow on you. They will roughen you up and tell you to get thicker skin and worse. The more you allow the world to affect you the more you'll be sensitive... just like a radar picking up a signature! It's a desirable property.

* Leave your assumptions on the side. There are many stupid ideas in enlightenment that are enforced onto you as "rational". For example the divisibility between people when you know this is essentially a falsehood. The isolation on the mind and more.
* Trust your intuition.
/End

don't let yourself off*
